

Navantis Quality Assurance Services

BENEFITS

:: :: ::

ON DEMAND TESTING

QA requirements vary from project to project; maintaining your own team of specialists and testers is expensive and inefficient. Navantis can scale a custom QA team to your requirements.

::

SINGLE POINT OF CONTACT

A QA Lead is designated at the start of the project, ensuring consistent, dedicated QA management. Benefit from the skilled leadership of an established QA professional.

::

GLOBAL QA TEAM

Clients have direct access to a full complement of experienced QA specialists, 24/7.

Quality Assurance (QA) is not just a single activity that happens at the end of a project. It is a process that occurs throughout the entire software development lifecycle, ensuring that tasks and requirements are completed as planned and in a timely manner. QA can encompass a multitude of complex tasks: documentation review, test planning, test case creation, test execution and User Acceptance Testing support. Is your organization prepared to manage all of these aspects of QA?

WHAT YOU NEED, WHEN YOU NEED IT

INSTANT QA OFFICE

A fully trained, experienced QA team, ready to go

QA OFFICE DEVELOPMENT

Guidance and support to establish and enhance your own QA team.

INSTANT QA OFFICE

- Navantis provides a fully-trained, experienced team of testing and Quality Assurance professionals, ready to perform as your own QA Office.
- Ramp up or down as required.
- No software licensing or purchasing costs.
- Proven QA approach, reporting methodology, and a Global Delivery model ensure expert, timely fulfillment of QA requirements.

QA OFFICE DEVELOPMENT

- Eliminate the learning curve; develop or enhance your QA Office with expert advice and guidance from Navantis.
- Our seasoned professionals can lead or support in-house QA Office development to ensure you hire the right people, train for the right skills and implement the right tools and methodologies.
- Staff augmentation available for short or long term assignments.

TESTING SERVICES

A multitude of testing services available 'a la carte' to ensure quality at every step:

- Functional testing: verification against specifications, negative/boundary testing
- Integration testing: end-to-end testing of workflows and processes
- Stress + Performance testing: client/server side metrics, points of failure, system capacity

REPORTING

- Comprehensive reporting through all phases of the development lifecycle of your project—understand the risks, identify the issues and solve the problems before they start.
- Business Intelligence at its best—distill your QA data into meaningful information so your organization can make the best decisions possible.
- Sophisticated reporting software to ensure your QA data is meaningful, intelligible and useful. Robust custom reporting features and functionality.
